PC Direct

— The Business Partner That's Right For You

Much of this 1991 catalogue is dedicated to the price and performance of the PC Direct range of IBM compatible personal computers. Of equal importance when considering the purchase of a computer is the company that you will purchase from. The partnership you form with your computer supplier can mean the difference between maximising your investment or a disappointing experience.

PC Direct is an international computer company specialising in high quality, industry standard personal computers. Our offices in five countries; Taiwan, USA, Japan, New Zealand and Australia are dedicated to the development, manufacture, sales and support of the PC Direct range of computers. PC Direct engineers, technicians, marketing and sales personnel amass decades of experience in computer technology, with a commitment that ensures we are a long term business partner. However, size alone will not guarantee you the service and support you deserve. At PC Direct we recognise that it takes a special attitude to keep our customers happy. SUPERIOR CUSTOMER SERVICE — PC Direct's ongoing commitment to being your long term computer partner.

From The Factory to Valued Customer

— The Direct Approach

As a PC manufacturer, we have established a unique relationship with our customers. We deal directly with them. The first and most obvious benefit of this approach is the price you pay. Because we avoid the traditional sales channel of manufacturer, distributor and dealer we are able to pass the savings on to you. Why should you bear the cost of unnecessary and often undeserved markups?

Secondly and probably more importantly, are the benefits of superior quality and leading edge technology. Taiwan is the home of PC Direct's purpose built 7,000 square feet manufacturing facility. Only superior name brand components are used in the assembly of PC Direct computers. Careful assembly, a multitude of software and hardware tests and 24 hour burn-in guarantee that the highest quality standards are adhered to. Our technical staff maintain a close relationship with component suppliers to ensure that PC Direct is kept abreast of new trends and developments. Purchasing offices in Japan and Silicon Valley USA co-ordinate component supply with PC Direct in Taiwan and maintain an international perspective on technical trends. Because of this approach we are in a position to take advantage of new advancements quickly, providing our customers with the latest leading edge technology.

PC DIRECT

Call Into Our Auckland Showroom

— We Would Love to See You

In New Zealand, PC Direct has 3,000 square feet of showroom, service and warehouse facility. A special showroom displays all models in the PC Direct range running the most popular application software and customers are welcome to bring in their own software to evaluate the performance of a particular PC Direct computer. Our sales staff are most happy to discuss your requirements with you and make knowledgeable recommendations regarding systems, applications and finance options. Or you can talk to our Lifeguard support engineers about our on-site service and 2 year parts and labour warranty. However, if you can't drop in to see us we have a nationwide mailorder service. See page 28 for further details.

PC Direct Computers are used by the following New Zealand organizations:

- Auckland Technical Institute
- University of Auckland
- Auckland City Council
- Ministry of Agriculture & Fisheries
- Beca Carter
- Peat Marwick
- Tauranga District Council
- Christchurch Polytechnic
- Canterbury Area Health Board
- NZ Forest Research Institute
- Greenpeace NZ
- Electricity Corporation of NZ
- New Zealand Steel
- Taranaki Polytechnic
- Dunedin City Council
- DSIR
- NZ Police College
- National Insurance
- Hyatt Kingsgate
- Tasman Timber
- NZFP Pulp & Paper
- Waikato Hospital
- Housing Corporation of NZ
- Otago Polytechnic
- Accident Compensation Corporation
- University of Otago
- Diners Club International
- Palmerston North City Council
- University of Waikato
- Thames Hospital

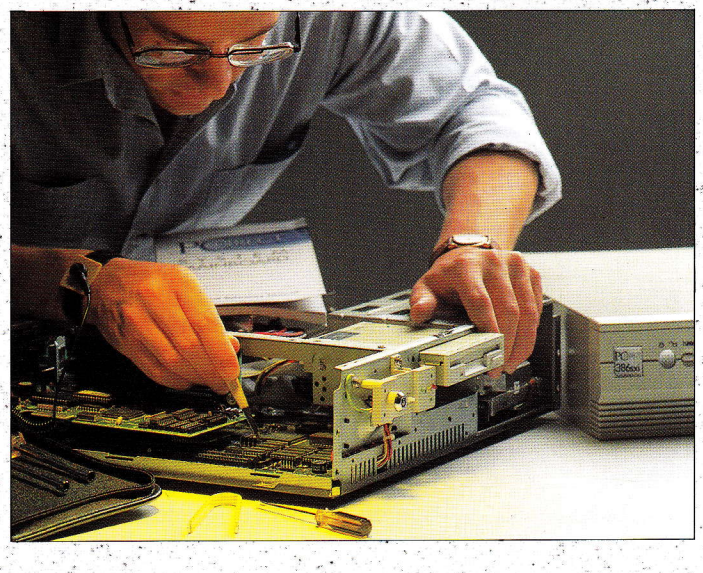
Lifeguard Customer Support

At PC Direct we deal directly with our customers. That's why we can provide them with the best and most comprehensive service and support in the business. LIFEGUARD Customer Support is the exclusive policy that summarises all the features that offer PC Direct users support and security that is second to none.

LIFEGUARD CUSTOMER SUPPORT INCLUDES:

- **Toll Free Technical Support**
- **On Site Service**
- **2 Year Warranty**
- **Technical Bulletin Board**
- **Superbase Customer Database**
- **7 Day Money Back Guarantee**



Toll Free 0800-655-343

It's better for you to talk directly to the manufacturer. So now we have made it easier for you to call us. The number above is our toll free telephone number. Call us from anywhere in the country for free technical support. Any questions you have about your PC Direct computer can be answered by one of our Lifeguard support engineers on the telephone. Call us. We would love to hear from you.

On-Site Service

When you purchase your PC Direct computer it includes 12 months of free nationwide on-site service; anywhere in New Zealand. If after calling Toll Free and talking with our Lifeguard support engineers your problem cannot be solved over the telephone, we will have you up and running by the next business day, often even sooner. Our Lifeguard engineers are supported by a team of Honeywell service technicians who operate from 17 service centres throughout New Zealand. If on-site service is necessary, we will arrange for a Honeywell technician to contact you within 4 hours. We appreciate how critical your computer can be to your business, so we aim to reduce any down time to a minimum.

PC WORLD

PC Direct was rated 2nd place by PC World readers for Best Hardware Service and Support from a total of 115 computer companies in New Zealand — including all the other "name brands".

PC DIRECT

2 Year Warranty

Even after the first 12 months of on-site service your PC Direct computer is still covered for a further 12 months parts and labour warranty. Because you are dealing direct with the manufacturer we know everything there is to know about our PC's — because we designed and built them! We have all the documentation, circuit diagrams and spare parts available immediately off the shelf. We also talk with our factory every day. By using the highest quality components available PC Direct offers twice the industry standard warranty. Just when other computer warranties are ending, PC Direct gives you the security and support of another 12 months free parts and labour warranty.

Technical Bulletin Board

For 24 hour access to the latest technical information on your PC Direct computer, dial into the free Lifeguard Technical Bulletin Board. This is our own in-house bulletin board with a continually updated collection of hints, advice, technical files and software.

Superbase Customer Database

When you call us we have a complete history of your purchases, upgrades and service records on a continually updated database. Our Lifeguard support engineers know the exact model and configuration of your PC Direct system in order to provide the best possible technical support.

7 Day Money Back Guarantee

We are so confident of the performance and quality of PC Direct computers that if you are not completely satisfied with your purchase you can return it within 7 days for your money back.

Finance Options*

Now is even easier to own the latest PC Direct computer system. We can tailor a finance plan to suit your company or personal budget. Call us today to discuss the competitive finance options available.

Performance

PC Direct computer systems are packed with power features for maximum performance. Every system component has been designed for performance, reliability and industry standard compatibily. The top quality, name brand components that are used in every PC Direct system show our dedication to building the very best.

VGA 1024

You will be stunned by the incredible graphics, crystal clear pictures and beautiful colours of the PC Direct VGA 1024 graphics system. All PC Direct VGA colour systems come with VGA 1024 standard.

- 14″ Super VGA 1024 colour monitor with 0.28mm dot pitch on tilt/swivel base. Maximum resolution of 1024 × 768 interlaced.
- High speed 16-bit VGA 1024 graphics card with 512K Video RAM (expandable to 1MB). Supports Hercules, CGA, EGA, VGA, 800 × 600 (16 and 256 colours) and 1024 × 768 (16 colours) standard and 1024 × 768 in 256 colours with 1MB RAM fitted.
- VGA 1024 card based on Trident 8900 chip-set with built-in video cache memory and internal 32-bit video memory bus. This card sets the performance standards in direct-access Super VGA cards.

PC Magazine (the Trident 8900) ''was about 20% faster than all other direct-access boards in both Microsoft Windows and AutoCAD tests.''

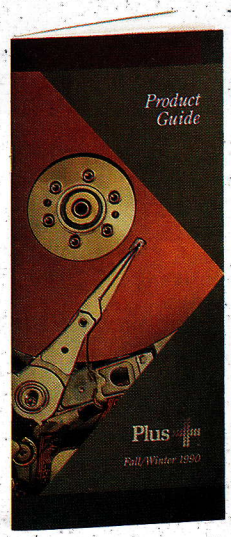
PC MAGAZINE

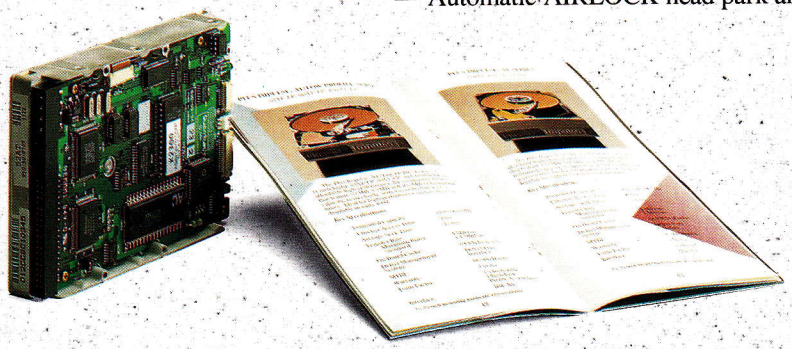
TRIDENT

DASH — Data Access System Hardware.

The new IDE hard drive sub-systems in PC Direct computers are fast, real fast!
For the fastest possible data access and exceptional reliability compare these specifications:

- 52MB and 105MB IDE hard drives with 17mS average access, 9mS effective access time* with 64K look-ahead DisCache!
- 170MB and 330MB IDE hard drives with 15mS average access, 8mS effective access time* with 64K look-ahead DisCache!
- Defect free media management with automatic sector mapping of field found defects
- 48-bit Error Correcting Code for maximum data integrity
- Automatic AIRLOCK head park and dedicated landing zone





Quantum

Plus

* As with any caching scheme, actual performance depends on the application

CPU and MEMORY

PC Direct systems match high speed CPUs with fast 0 wait state memory for maximum performance. The Landmark speed ratings show the real number crunching speed that true 0 wait state design enables. All systems incorporate Shadow RAM design so that the memory between 640K and 1MB can be used to map BIOS and Video ROMs into high-speed RAM for faster access. On the high-end 386ci, 486i and 486ei main memory access has been further enhanced by the addition of an extra 64K of dedicated high-speed static RAM with caching management.
